

Observe the first week

01

Agree the task

02

Record observations

03

Choose a next test

Blank research worksheet. No participant results have been recorded here.

PILOT: repeat for P1, P2, P3, P4, P5

Participant code / date:

Voluntary participation agreed:

Separate recording or publication permission, if applicable:

Goal and starting path:

Could make a plan without help? Observation:

Could save and find it again? Observation:

Next action in their own words (permission required to publish):

Confusion / assistance / suggested change:

Optional follow-up permission and date (keep contact details separately):

First task attempted? Evidence / unknown:

What happened after a week:

COMPARE EQUIVALENT FINISHED WORK

Measured workflow case study

Task / date / comparable input definition:	Acceptance criteria agreed before running:
Manual run: human minutes / elapsed minutes / accepted output:	Assisted run: briefing / handoff / review / corrections minutes:
One-time setup minutes:	Failures and discarded attempts:
Accepted output and quality comparison:	Tool cost / currency / allocation basis:
AI role prompts and redacted input references:	Evidence location (no confidential data):
Limitations / sample size / order effects:	First-run result:
Reuse scenario, clearly labeled assumptions:	Decision: continue / change / pause:
Next test:	

EVIDENCE BOUNDARY

Unknown is not zero. A usability test is not evidence of income.
